**RESPONSE TO NOTICE OF NON-RESPONSIVE AMENDMENT**

Sir:

Applicant has received a Notice of Non-Responsive Amendment mailed April 18, 2006. The Notice states that the reply filed on January 30, 2006 was not fully responsive to the prior Office Action because Applicant simply deferred any rebuttal to the obviousness-type double patenting rejection.

The obviousness-type double patenting rejection was a provisional rejection. The Examiner is correct that Applicant deferred substantive rebuttal of the provisional rejection until the cited application is allowed. MPEP 804(I)(B) states that "the merits of such a provisional rejection *can* be addressed by both the applicant and the examiner without waiting for the first patent to issue" (emphasis added). Notably, the MPEP does not state that the merits *must* be addressed in such a situation. Moreover, the MPEP also states that "the 'provisional' double patent rejection should continue to be made by the examiner in each application as long as there are conflicting claims in more than one application unless that 'provisional' double patenting rejection is the only rejection remaining ...". *Id.* At that point, the examiner must withdraw the provisional rejection and allow the claims. Consistent with this practice, Applicant defers substantive rebuttal of the provisional rejection until the cited co-pending application is allowed, and in the alternative requests withdrawal of the rejection once it is the only remaining rejection.
